Art Unit: 1636

DETAILED ACTION

Claims 3, 4, 12 and 15 are pending in the present application. This Office action is in response to Applicant's amendment and remarks filed 20 October 2003.

Response to Amendment

The rejection of claims 3, 4, 12 and 15 under 35 U.S.C. 112, first paragraph has been withdrawn in view of Applicant's amendment and remarks filed 20 October 2003.

The rejection of claims 5, 11, 13 and 14 is moot due to their cancellation in Applicant's amendment.

New Grounds of Rejection Necessitated by Applicant's Amendment Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 4 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker et al. (Journal of Rheumatology Vol.16 no.1 1989).

The invention of the present claims are drawn to methods of identifying agents involved in mitochondrial function comprising comparing ATP synthesis in biological samples comprising chondrocytes in the presence or absence of a candidate agent.

Application/Control Number: 09/661,848

Art Unit: 1636

Baker et al. disclose a method wherein ATP was measured articular cartilage samples, which includes chondrocytes, in the presence or absence of an agent, H_2O_2 (Baker et al., abstract; page 8, column 2 paragraph 1-2; page 9-10, bridging paragraph).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The last clause of the present claim is drawn to "determining the suitability of said candidate agent" while the preamble of the claim is drawn to a method of "identifying" an agent. There is a logical disconnect between the last step of determining and the preamble reciting the identification of an agent.

Allowable Subject Matter

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/661,848

Art Unit: 1636

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Konstantina Katcheves whose telephone number is (571) 272-0768. The examiner can normally be reached on Monday, Tuesday, Thursday and Friday 7:30 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Remy Yucel, Ph.D. can be reached on (571) 272-0781. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
